Welcome to the R1Soft - Windows Agent Utility Guide

The purpose of this manual is to provide you with complete instructions on how to use your R1Soft - Windows Agent Utility 2.14 - software.

To find a specific topic in a particular section, click on the topic name in the Table of Contents which is located on the left of every page. This TOC reflects a physical (tree) structure of pages in the "R1Soft Documentation" space. Note that a plus sign next to the topic name means that the topic contains subpages. To access the subpages, click on the plus sign thereby expanding the topic structure.

You can also use the Guide's TOC located on the Guide's parent page. This Table of Contents provides a logical, instead of a physical, structure of guides. The links may point to separate pages and to sections within the pages.

You can do a site search to quickly find what you are looking for. Confluence will search all content, including attachments. To do a quick search, type your keyword into the search box, located in the top bar of every screen and then press <Enter>.
