Windows Agent Getting Started Guide

Welcome to the R1Soft - Windows Agent - Getting Started Guide

The purpose of this manual is to provide you with complete installation procedures to install the R1Soft - Windows Agent 2.14 - software.

To find a specific topic in a particular section, click on the topic name in the Table of Contents which is located on the left of every page. This TOC reflects a physical (tree) structure of pages in the "R1Soft Documentation" space. Note that a plus sign before the topic name means that the topic contains a set of subpages. To access the subpages, click on the plus sign.

You can also use the Guide's TOC located on the Guide's parent page. This Table of Contents provides not a physical but a logical structure of guides. The links may point at separate pages and to the sections within pages.

You can do a site search to quickly find what you are looking for. Confluence will search all content, including attachments. To do a quick search, type your keyword into the search box, located in the top bar of every screen and then press <Enter>.
