Problem encountered when a Disk Safe is on a Device that is completely full (0 bytes available)

Problem encountered when a Disk Safe is on a Device that is completely full (0 bytes available)

Symptom

User encounters the following error on CDP Server startup or while viewing the CDP Server web GUI.

```
JDBCConnectionException: Cannot open connection
```

Error encountered in SERVER.LOG or Web GUI:

```
javax.persistence.PersistenceException: org.hibernate.exception.JDBCConnectionException: Cannot open connection
Caused by: org.hibernate.exception.JDBCConnectionException: Cannot open connection
Caused by: java.sql.SQLNonTransientConnectionException: No current connection.
Caused by: java.sql.SQLException: No current connection.
```

Confirm in MONITOR.LOG:

```
0000-00-00 00:00:00,000 ERROR  - Page Page(?,Container(?, ?)) could not be written to disk, please check if the disk is full, or if a file system limit, su
0000-00-00 00:00:00,000 ERROR  - Java exception: 'No space left on device: java.io.IOException'.
0000-00-00 00:00:00,000 ERROR  - could not complete schema update
0000-00-00 00:00:00,000 ERROR  - No current connection.
```

Stack Trace:

```
org.hibernate.exception.GenericJDBCException: could not get table metadata: ?
Caused by: java.sql.SQLException: Page Page(?,Container(? ?)) could not be written to disk, please check if the disk is full, or if a file system limit, su
Caused by: java.sql.SQLException: Java exception: 'No space left on device: java.io.IOException'.
Caused by: java.io.IOException: No space left on device
```

Cause

There is no free space to write data.

Resolution

Free up disk space on the Device or move the Disk Safe to a Device that has ample free space.
