Hosting Control Panel Add-On Admin Guide

Welcome to the R1Soft - Control Panel Add-On Admin Guide

The purpose of this manual is to provide you with complete instructions on how to use your R1Soft Control Panel Add-On Module and to introduce some key CDP Server functions important for using the Control Panel Add-On Module. When you use Righteous Backup with the Control Panel Add-On Module, all functions found in Righteous Backup are available. Refer to the CDP Server Admin Guide and CDP Server User Guide for more information.

To find a specific topic in a particular section, click on the topic name in the Table of Contents, which is located on the left of every page. This TOC reflects a physical (tree) structure of pages in the "R1Soft Documentation" space. Note that the plus sign before the topic name means that the topic contains some subpages. To access the subpages, click on the plus sign to expand the topic structure.

You can also use the Guide's TOC located on the Guide's parent page. This Table of Contents provides not a physical but logical structure of guides. The links may point to separate pages and to sections within the pages.

You can do a site search to quickly find what you are looking for. The Confluence application will search all content, including attachments. To do a quick search, type your keyword into the search box, located on the top bar of every screen and then press <Enter>.
