

Linux Bare-Metal Restore Guide

Linux Bare-Metal Restore Guide

READ ME FIRST

Welcome to the R1Soft - Linux Bare-Metal Restore Guide

The purpose of this manual is to provide you with complete instructions on how to perform a Bare-Metal Restore of your Linux Server from the Backup made by CDP Server Stand Alone or CDP Server For Data Centers.

To find a specific topic in a particular section, click on the topic name in the Table of Contents.

Common Questions

You may want to view our list of common questions located in the following document:

[Common Questions](#)

Table of Contents

- 1 Common Questions
- 2 What is Bare-Metal Restore
- 3 About Bare-Metal Disaster Recovery of Disk Safes Using Encryption
- 4 Options for Performing Linux Bare-Metal Restore
- 5 Testing Bare-Metal Restore Before an Emergency
- 6 Network Configuration
- 7 Bare-Metal Restore Using Boot CD-ROM
 - 7.1 Obtaining Live CD Software
 - 7.2 Booting Linux Host From CD
- 8 Bare-Metal Restore Using Live Boot Remote Restore
 - 8.1 Obtaining Live Boot™ Remote Restore Software
 - 8.2 Installing Live Boot™ Remote Restore Software
- 9 Bare-Metal Restore Using PXE Network Boot
 - 9.1 Prerequisites for Using PXE Network Boot
 - 9.2 Obtaining PXE Network Boot Software
 - 9.3 Configuring DHCP Server on Linux or Unix (ISC DHCPD)
 - 9.4 Configuring TFTP Server on Linux or Unix

9.5 Using PXE Network Boot
