Exploring VHD Volumes

Exploring VHD Volumes

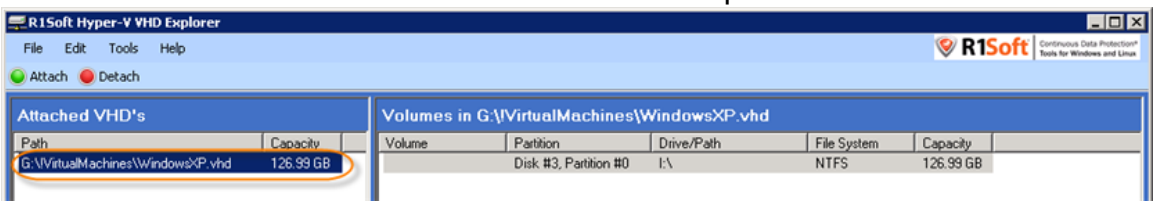
Using the R1Soft Hyper-V VHD Explorer, you can explore the files and folders that are contained on a VHD volume.

> **Note**
> You can explore only mounted volumes. See Mounting VHD Volumes.

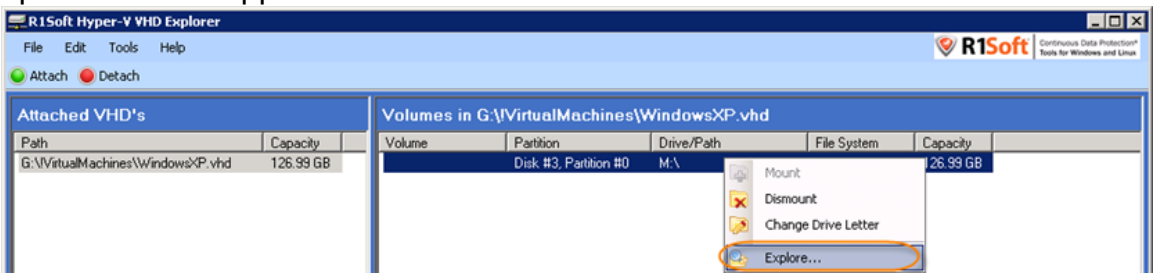
To explore a volume, follow the instructions below.

1. Launch the R1Soft Hyper-V VHD Explorer.

2. Select an attached VHD in the "Attached VHDs" pane.



3. In the right pane, right-click a volume contained in a mounted VHD. Select the "Explore..." option from the appeared menu.



4. You can explore the Volume in the opened Windows Explorer window.
