Archiving Add-On User Guide

Welcome to the R1Soft — Archiving Add-On — User Guide

The purpose of this manual is to provide you with complete instructions on how to use the CDP Archiving Add-On.

To find a specific topic in a particular section, click on the topic name in the Table of Contents located on the left of every page. This TOC reflects a physical (tree) structure of pages in the "R1Soft Documentation" space. Note that the plus sign before the topic name means that the topic contains subpages. To access the subpages, click on the plus sign to expand the topic structure.

You can also use the Guide's TOC located on the Guide's parent page. The Table of Contents provides a logical structure of guides. The links point to separate pages and to sections within pages.

You can do a site search to quickly find what you are looking for. Confluence will search all content, including attachments. To do a quick search, type your keyword into the search box located in the top bar of every screen and then press <Enter>.

Common Questions

You might want to view our list of common questions located in the following document: Common Questions

Table of Contents / Document Order

In order to get the most out of this manual, please follow the order shown below.
