

Upgrading a Pooled License

Tip

License Pools allow customers to create and destroy their own CDP Server license out of their pool at the web portal <https://dist.r1soft.com>

To upgrade a license in the Pooled License:

1. Make sure that your license pool has been set up.
2. If your license pool has not been set up, you will need to contact your account manager.

Step 1

In the [client portal](#), click on the "License Pools" menu item.

Step 2

Open the License Pool containing licenses that you would like to upgrade (if you have more than one).

Step 3

Open the pooled license you would like to upgrade

Step 4

Select the Upgrade button at the bottom of the screen. Type the new number of servers to add to this license and select Continue.

Step 5

Once you have completed the input entry form, you will be taken back to the overview screen that shows the changed quantities.
