Documentation Quick Start Guide

Your needs	Resources
• I am new to R1Soft and want to learn how to download, install and run my first R1Soft CDP software.	Obtaining and installation is described in the following sections: • Enterprise Edition • Advanced Edition • Standard Edition • CDP Data Center Console
• I need instructions on how to manage Users and Groups. • I would like to know the difference between the types of the Users. • I want to create groups for users.	Find all the information about users and groups in the following section: • Users and Groups
• I need instructions on how to manage CDP Agents.	• Accessing Agents • Adding the Agent to the CDP Server • Changing Agents • Customizing the Agents List • Testing Agent Connection • Deleting Agents • Starting CDP Agent in Recovery Mode

• I am a service provider using CDP Enterprise Edition and I need to manage Volumes with my customers' Disk Saves.	• Accessing Volumes • Creating Volumes • Changing Volumes • Assigning Users and Groups to a Volume • Importing Existing Volume • Customizing the Volumes List • Removing Volumes • Deleting Volumes
• I need general information about Disk Saves, their reliability and instructions on how to manage Disk Saves in CDP.	• Disk Safes • Disk Safe Best Practices • Accessing Disk Safes • Creating Disk Safes • Customizing the Disk Safes List • Editing Disk Safes • Closing Disk Safes • Attaching Disk Safes • Detaching Disk Safes • Deleting Disk Safes • Copying and Moving Disk Safes • Storing Disk Safe on a Windows Network Share • Vacuuming Disk Safes • Managing Disk Safe Encryption
• I would like to know how to manage Devices in CDP.	• Adding Devices • Accessing Devices • Disabling Devices • Removing Devices

Policies are described in the following section:

• I would like to know what Policy is. • I need instructions on how to manage Policies.	• Policies
• I have R1Soft backup solution installed and I run regular backups. And now, because of a disaster, I need to immediately restore my data. • I would like to test how "data restore" works in my environment. • I want to run Bare-Metal Restore. • I have questions regarding restoring in CDP.	See the following section: • Bare-Metal Restore Also refer to the following pages: • Restoring Files • Restoring a MS SQL Database • Restoring a MS 2007 Exchange Storage Group • Restoring a MS Exchange 2010 Mailbox • Restoring VHDs
• I need instructions on how to manage Recovery Points.	• Accessing Recovery Points • Browsing Recovery Points • Customizing the Recovery Points List • Locking Recovery Points • Merging Recovery Points • Exporting Files from a Recovery Point • Scheduling the Recovery Points Merge • Scheduling the Recovery Points Replication
• I want to receive information about Task fulfillment via e-mail.	Refer to the following section: • Reporting

• I need to integrate CDP into my billing and provisioning systems.	Read the following information: • API Documentation
• I need information about licensed Agent Add-On Modules.	Agent Add-On Modules are described in the following sections: • CDP for MySQL • CDP for Hosting Control Panels
• I need information about how to configure CDP Server and Agent.	Refer to the following sections: • Configuring CDP Server • Configuring CDP Agent
• I want to test how Linux Agent CLI works.	Read information in the following section: • Linux Agent CLI
• I would like to know how to administrate CDP.	Administrating CDP is described in the following section: • Administrating CDP
• I have R1Soft software installed. And I have a question regarding the workings/functionality of the software.	• Enterprise Edition Common Questions • Advanced Edition Common Questions • Standard Edition Common Questions • Data Center Console Common Questions

- I want to print the R1Soft documentation.
- I want to save the R1Soft documentation on my local computer.
- I want to have the R1Soft product documentation as a single file (Guide).

This page contains direct links to all Guides in PDF format:

- All PDFs

- I am a hosting provider and I am looking for new services that will add value to my hosting but with minimal investment.

- CDP for Hosting Control Panels
