CDP 3 Licensing API Example - enableLicense

This example provides you a code snippet for RPC calls for enabling a pool/specific license.

```
#### For enabling the pool/specific license
#### Make RPC Call Start ####
 $xmlrpc_msg = new xmlrpcmsg('licensing.enableLicense', array(
  new xmlrpcval($licPool, 'string')
 ));
 $reply = $client->send($xmlrpc_msg);
#### Make RPC Call End ####
```
