

# Solved Issue with Missing Files in the Files Restore View

## Symptom

---

In the Files Restore window, some files are not listed.

## Cause

---

The problem appears to occur when a default number of items per page has not been set.

## Resolution

---

The issue has been corrected in CDP 4.2.0. Paging through long lists of files no longer leaves white space at the bottom of the view, or requires any refreshing to restore the proper views. All files are displayed.
