

Accessing Policies

Follow the instructions below to access the "Policies" window via the CDP Interface.

Click on "Policy" in the Main Menu to open the "Policies" window.

Standard Edition	Enterprise Edition	Advanced Edition
 <p>Standard Edition Main Menu: Dashboard, Disk Safes, Policy (highlighted), Recovery Points, Task History, Reporting, Configuration.</p>	 <p>Enterprise Edition Main Menu: Dashboard, Volumes, Agents, Groups, Users, Disk Safes, Policy (highlighted), Recovery Points, Task History, Reporting, Configuration.</p>	 <p>Advanced Edition Main Menu: Dashboard, Users, Disk Safes, Policy (highlighted), Recovery Points, Task History, Reporting, Configuration.</p>

Tip

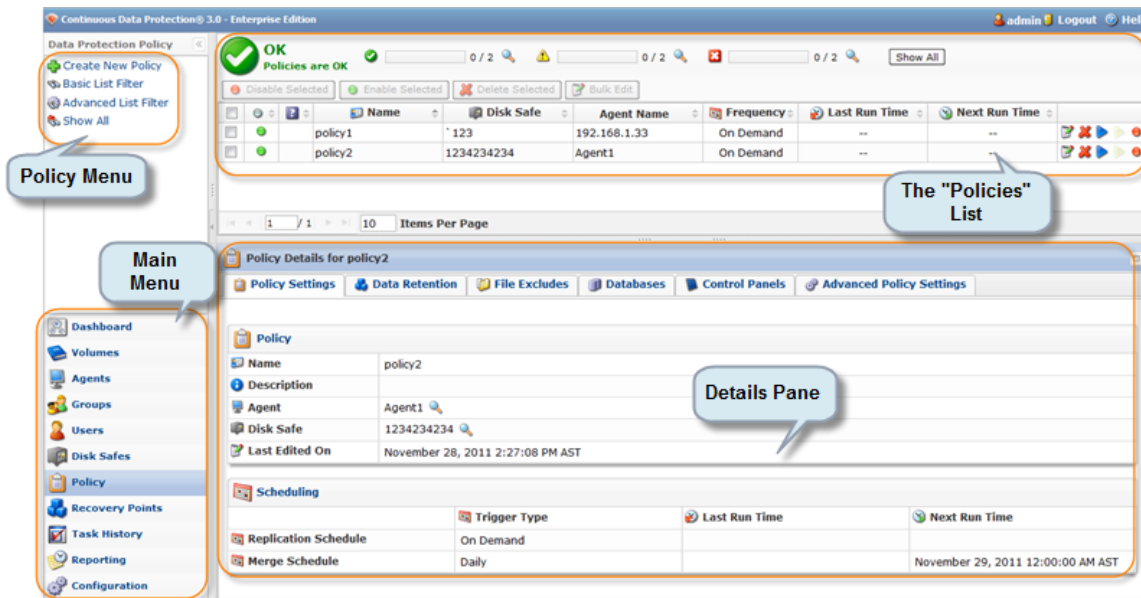

You can access the "Policies" window by manually appending the /Policy/ folder to the CDP Server address in the browser address bar. Example:

<http://10.61.200.31/Policy/>. Note that the address is case sensitive.

The "Policies" window is divided into the following areas:

- Policy Menu - Provides access to the actions which relate to the managing Policies and customizing the "Policies" list.
- Policies List - The Policies created within the system are displayed in this area.
- Details Pane - After you select an item in the list, its details are displayed in this area.

You can also access the "Policies" list associated with the selected Agent using the "Policies" tab of the Agent "Details" Pane. This screen provides the same functionality as the main "Policies" screen including policy creating. See more information in [Accessing Agents](#).

Policy Menu | "Policies" List | Details Pane

Policy Menu

The following Policy menu buttons are available:

- **Create New Policy** - Allows you to add a new Policy to the system. After clicking on this button, you will be able to define the new Policy settings and exclude files and folders. See [Creating Policies](#) and [Excluding Files and Folders](#).
- **Basic List Filter** - Allows you to customize the view of the "Policies" list by applying the minimum range (most commonly used) of filter criteria. See [Customizing the Policies List](#).
- **Advanced List Filter** - Allows you to customize the view of the "Policies" list by applying any possible filter criteria. See [Customizing the Policies List](#).
- **Reset Filter** - Cancels filter settings and shows all records in the "Policies" list. See [Customizing the Policies List](#).

"Policies" List

The "Policies" list provides information about Policies in the grid.

Tip

You have an option to organize information, such as filtering out the items you do not need to see. You can also sort items, limit the number of items displayed per page, and specify which columns you want to display. See [Customizing the Policies List](#).

Tip

To find out the title of the column heading, hover the mouse pointer over the column heading, without clicking it. The title will be displayed in a yellow tooltip.

The screenshot shows the Policies list interface. Callouts identify various components: 'List Buttons' points to the top toolbar; 'Columns' points to the table header row; 'Pages Navigation' points to the bottom pagination controls. The table contains two rows of policy data.

	Enabled	Name	Disk Safe	Frequency	Last Run Time	Next Run Time	
<input type="checkbox"/>		On Demand	Disk_Safe_1	On Demand	--	--	
<input type="checkbox"/>		Daily	Disk_Safe_2	Daily	28.04.11 8:59	28.04.11 21:00	

At the bottom, the pagination shows '1 / 1' and '10 Items Per Page'.

Columns:

- Enabled - Graphically indicates the Policy status ("Enabled" or "Disabled"). If the icon is green, then the Policy is enabled. The red icon is used for disabled Policies.
- Status (**Enterprise Edition**) - Graphically indicates the Policy state. The green icon indicates the Policies that run without errors; the yellow icon indicates the Policies that have warnings while processing; the red icon indicates the Policies that run with errors; the blue icon indicates the Policies with unknown status.
- Name - The unique name of the Policy.
- Description - Additional information about the Policy. This field is also unique.
- Disk Safe - The selected Disk Safe to save the replicated data in.
- Agent Name (**Enterprise Edition**) - Shows the name of the Agent.
- Agent Host Name/IP (**Enterprise Edition**) - Shows the IP address of the Agent.
- Last Edited On - The date and time when the Policy was created or last edited.
- Frequency - Recurrence selected for running the Policy (On Demand, Minutely, Hourly, Daily, Weekly, Monthly, or Yearly).

- Last Run Time - Date and time when the Policy was started last time.
- Next RunTime - Date and time when the Policy will run next time according to the schedule.
- Actions - Provides access to actions available for the Policy.
 - Edit - See [Editing Policies](#).
 - Delete - See [Deleting Policies](#).
 - Run Now - See [Running Policies](#).
 - Disable - See [Disabling Policies](#).

List Buttons

The buttons provide you control over one or several items selected in the "Policies" list.

- Disable Selected - Once one or several enabled Policies are checked in the list, this button allows you to disable them simultaneously. See [Disabling Policies](#).
- Enable Selected - Once one or several disabled Policies are checked in the list, this button allows you to enable them simultaneously.
- Delete Selected - Once one or several Policies are checked in the list, this button allows you to permanently remove them from the system. See [Deleting Policies](#).
- Bulk Edit - Allows you to edit the settings of several selected Policies simultaneously. See [Editing Policies](#).

Pages Navigation

The Pages Navigation pane allows you to divide the "Policies" list into pages by specifying a number of items per page. The Pages Navigation pane provides you with buttons to navigate from one page to another.

- Arrows - Turns over pages.
 - First - Opens the first page.
 - Previous - Opens the previous page.
 - Next - Opens the next page.
 - Last - Opens the last page.
- Page Number - Field to type in the page number. Press <Enter> to go to the required page. The total number of the existing pages is shown on the pane.
- Items Per Page - Used to define how many items to display per page in the "Policies" list. The system remembers your settings. Unless you change this setting, you see 10 items per page. But if you want to see more/less items per page, you can change the number and press <Enter>. The maximum number of items per page is 25.

Errors (Enterprise Edition)

If one or more Policies run with errors, the "Error" icon is displayed in the upper area with a table of Policies status.

Errors tab displays each type of Policy status as an icon. All possible states are listed in the following table.

	Indicates the Policies that are not OK.
	Indicates the Policies that have warnings.
	Indicates the Policies that are OK.

Errors tab displays the number of all Policies and Policies that are in a particular state.

Click on the "Detail" icon, to sort the Policies list according to the state of Policy.

Click on "Show All," to show the list of all Policies.

Details Pane

This pane provides you with detailed information about the Policy selected in the list. The following tabs are available:

- Policy Settings
- Data Retention
- File Excludes
- Databases
- Control Panels
- Advanced Policy Settings

Policy Settings Tab

Most of the presented data is the same as the data shown in the "Policies" list columns. The following information is available:

Policy Details for Virtuozzo

Policy Settings | Data Retention | File Excludes | Databases | Control Panels | Advanced Policy Settings

Policy

Name	Virtuozzo
Description	Virtuozzo
Agent	Virtuozzo
Disk Safe	Virtuozzo
Last Edited On	October 27, 2011 1:58:23 PM CDT

Scheduling

	Trigger Type	Last Run Time	Next Run Time
Replication Schedule	Daily	October 26, 2011 1:17:14 PM CDT	
Merge Schedule	Daily	November 17, 2011 12:00:11 AM CST	November 29, 2011 12:00:00 AM CST

Policy

- Name - The unique name of the Policy.
- Description - Additional information about the Policy. This field is also unique.
- Agent (**Enterprise Edition**) - The name of the Agent.
- Disk Safe - The name of the assigned Disk Safe.
- Last Edited On - The date and time when the Policy was created or last edited.

Scheduling

- Replication Schedule - Displays the Replication Schedule of the Policy. See [Scheduling the Recovery Points Replication](#).
- Merge Schedule - Displays the Merge Schedule of the Policy. See [Scheduling the Recovery Points Merge](#).

Tip

You can collapse/expand the details of the Disk Safe or Agent by clicking on the "Details" icon.

Policy

Name	policy2
Description	
Agent	Agent1
Disk Safe	1234234234
Last Edited On	November 28, 2011 2:27:08 PM AST

Data Retention Tab

- Recovery Point Retention - Shows the Recovery Point Limit - the maximum number of stored Recovery Points. When the number is exceeded, the Recovery Points will be merged. See [Merging Recovery Points](#).
- Archive Point Retention - Shows the Archiving Schedule. See [Creating Archiving Policies](#).

File Excludes Tab

Displays the "Files Excludes" rules for the selected Policy.

Columns:

- Exclude Type - Graphically shows a type of the Exclude rule:
 - Selected - This type means files and folders were selected to exclude in the "File and Folder Excludes" tab of the Policy window. See more in [Excluding Files and Folders](#).
 - Advanced - This type means advanced exclude rules are defined in the "Advanced Excludes" tab of the Policy window to exclude files and folders on the basis of the mask ("pattern"). See more in [Excluding Files and Folders](#).
- Recursive - If enabled, the exclude rule will be applied not only to the root folder files, but also to the files from sub-folders. Used only for advanced excludes.
- Exclude Pattern - Depending on the type, in this column you can see files and folders to exclude or exclude mask.

See also: [Excluding Files and Folders](#).

**Tip**

You can filter the items shown on the tab by Exclude Type. Use the checkboxes at the top of the tab.

**Databases Tab**

Displays the MySQL instances that are being replicated.

**Control Panels Tab**

Displays the "Control Panel Instances" of the selected Policy.

Columns:

- **State** - Current state of the Control Panel Instance. It can be defined as:
 - Enabled - To display only enabled Instances.
 - Disabled - To display only disabled Instances.
- **Type** - The type of the Control Panel Instance, which specifies what kind of control panel is being configured. It can be defined as:
 - cPanel - To display Control Panel Instances of cPanel type.
 - Plesk - To display Control Panel Instances of Plesk type.
 - Virtuozzo - To display Control Panel Instances of Virtuozzo type.
 - Parallels Pro - To display Control Panel Instances of Parallels Pro type.
 - Interworx - To display Control Panel Instances of Interworx type.
 - DirectAdmin - To display Control Panel Instances of DirectAdmin type.

- Name - The unique name of the Control Panel Instance.
- Control Panel Instance ID - the unique identification number of the instance.
- Login - Contains the link to the page to log in and get an access to the certain Control Panel data.

Advanced Policy Settings Tab

Displays the advanced settings of the selected Policy.

See [Creating Policies](#).
