Getting the URL to the CDP for Control Panel Users

Control Panel Users can access and download their archives directly in the CDP Web Interface. The system automatically creates accounts in CDP for each Control Panel user. CDP for Control Panel users is available via a special URL generated by the system once the Policy has been added. Users can log in using their Control Panel credentials.

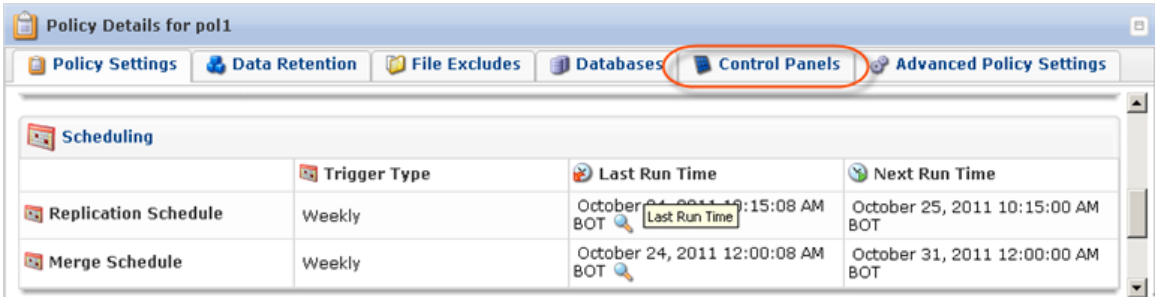

Follow the instructions below to get the URL to the CDP for Control Panel users.

1. Click on "Policy" in the Main Menu to access the "Policies" page.

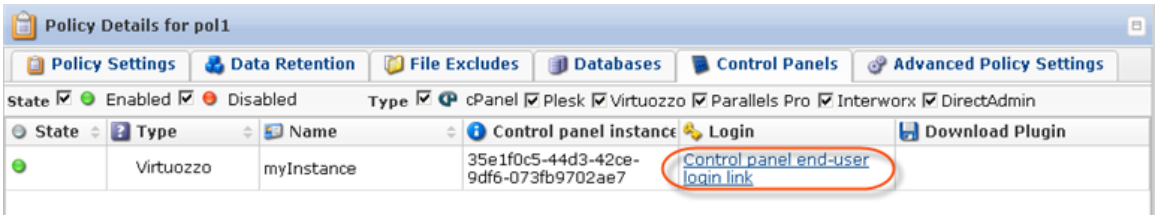

2. Click on the necessary Policy with Control Panel Instances added.

3. Choose "Control Panels" tab in the Policy Details pane.

4. In the "Login" column, the URLs to CDP for Control Panel users are listed.
