

VHD File Restore

VHD File Restore

You can include VHD files in a CDP 3.0 [Policy](#) and restore them using the [Recovery Points](#). See [Restoring VHDs](#).

After you have restored the VHD file, in order to access its contents you need to attach and mount it using the Hyper-V VHD Explorer. See [Attaching VHDs](#), [Mounting VHD Volumes](#).

You can also perform a [Bare-Metal Restore](#) from the VHD file. See [Bare-Metal Restore in Windows Hyper-V](#).
