

Sending Your Control Panel Account Backup to Control Panel Home

After a backup is performed, data is stored in a created [Recovery Point](#). There are three ways to restore or access your files:

1. Restore selected files to their original location. See [Restoring Your Control Panel Account](#).
2. Download files to local computer and upload files via FTP to website (Control Panel home). See [Downloading Your Control Panel Backup to Local Computer](#).
3. Send a TAR or ZIP archive containing selected or all files to the Control Panel home directory.

This topic describes the third option. Follow the instructions below to send a TAR or ZIP archive containing selected or all files to the Control Panel home directory.

Tip

These instructions are for Control Panel end-users.

1. Access the R1Soft CDP Web Interface. For more information, refer to these articles:

- [Accessing Your Account Backups via Direct Link](#)
- [Accessing Your Account Backups via cPanel Plugin](#)

2. You will see a list of Recovery Points in which your user data is stored.
