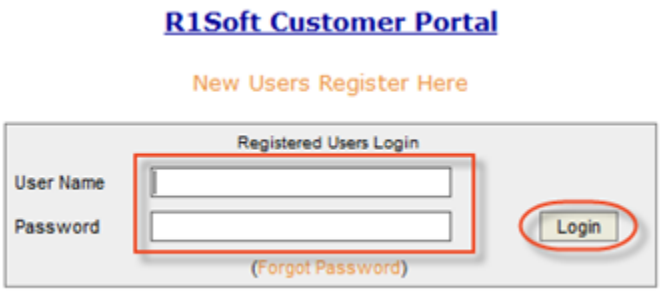
Obtaining Linux CDP Advanced Edition

To download the Linux CDP 4.2.0 software using R1Soft Customer Portal, perform the following steps:

1. The software for Linux CDP 4.2.0 can be obtained via direct download from the R1Soft website at https://dist.r1soft.com/download/.

2. Log in to the R1Soft Customer Portal by entering your User Name and Password in the form on the right-hand side of the screen. Registration is required for all downloads.

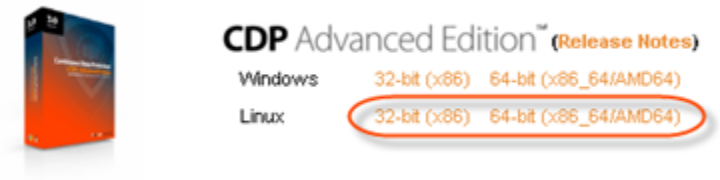


> **Note**
> Existing customers can use their R1Soft Customer Portal Login. The forum and tech support help desks have different logins.
> New customers can request a free trial download at http://www.r1soft.com/nc/company/download-cdp-advanced-edition-trial/.

3. Click on the "CDP 4.0 Downloads" link.

4. Locate the "CDP Advanced Edition" product group.

5. To download, click on the "32-bit (x86)" link for 32-bit binary Hardware/OS. Click on the "64-bit (x86_64/AMD64)" link for 64-bit binary Hardware/OS.



6. One of the following products should be downloaded:

For a 32-bit system:

- File name - R1Soft-AdvancedEdition-linux32.zip
- File size - 252 MB

For a 64-bit system:

- File name - R1Soft-AdvancedEdition-linux64.zip
- File size - 245 MB

Proceed to the next step: Installing Advanced Edition on Linux.
