

## Removing Volumes

Removing a [Volume](#) will delete the Volume configuration from this CDP Server. All backed up data will remain on the disk and the Volume folder is kept.

Removing a Volume is useful when you need to transfer it between Agents. After being removed on one Agent it can be imported on another. See [Importing Existing Volume](#).

Follow the instructions below to remove a Volume in CDP.

1. Click on "Volumes" in the Main Menu to access the "Volumes" page.

2. In the right top area, find a Volume and click "Remove" icon for this Volume in the "Actions" column.

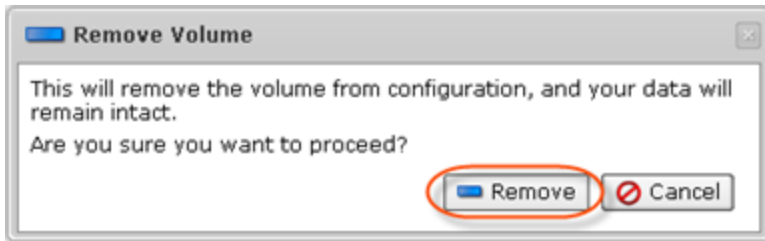

| <input type="checkbox"/> | Name    | Description | Volume Path | On Disk Size | Actions |
|--------------------------|---------|-------------|-------------|--------------|---------|
| <input type="checkbox"/> | Volume0 | Volume0     | /backup/0   | 10.3 GB      |         |
| <input type="checkbox"/> | QA      | QA          | /QA         | 2.8 GB       |         |
| <input type="checkbox"/> | DEV     | DEV         | /dev2       | 3.7 MB       |         |

### Tip

To find a Volume, you can use the Basic and Advanced List Filters. See [Customizing the Volumes List](#).

3. Confirm your request to remove the Volume by clicking on "Remove" in the displayed confirmation window.

4. The Volume will disappear from the "Volumes" list.
