

Scheduling the Recovery Points Replication

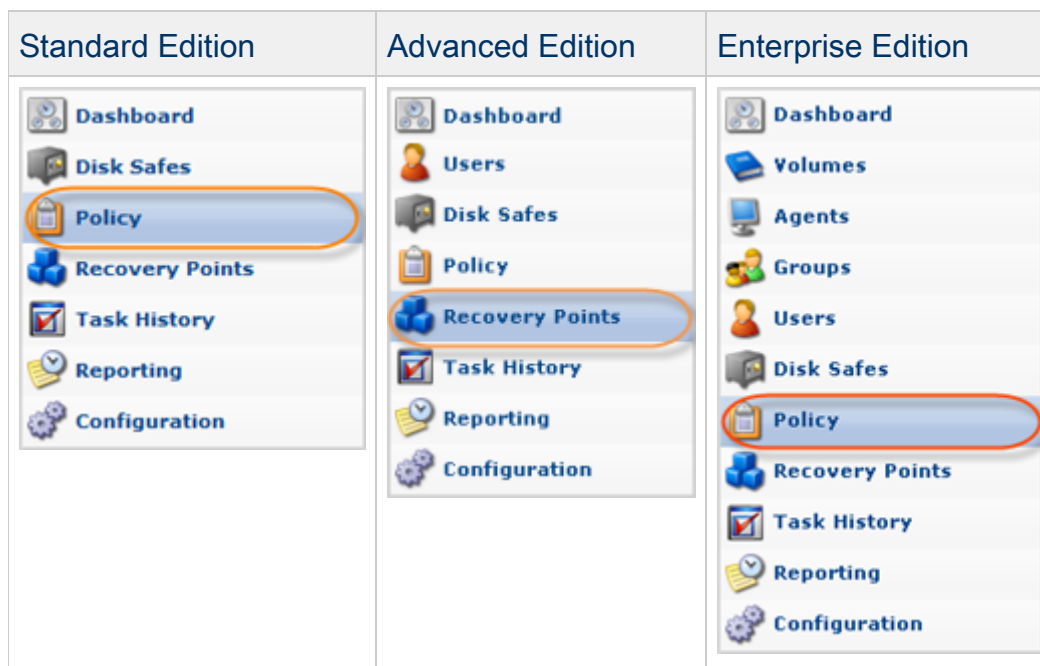

Note

The lowest possible replication frequency for all the Disk Safes assigned to Volume is defined in Volume properties (Volume properties window > "Limits" tab > "Options" section > "Replication Limit" option).

Follow the instructions below to schedule a new Replication Policy or edit the existing one.

1. Click on Policy in the Main Menu to open the Policies window.

2. In the Policy menu, click on Create New Policy.

Or

Select an existing policy from the list and click Edit.

Scheduling

Replication Schedule **Edit Schedule** Replication schedule is ON DEMAND, policy must be manually ran.

Merge Schedule Recovery points are being merged on a DAILY schedule.

4. The Trigger Picker window will appear.

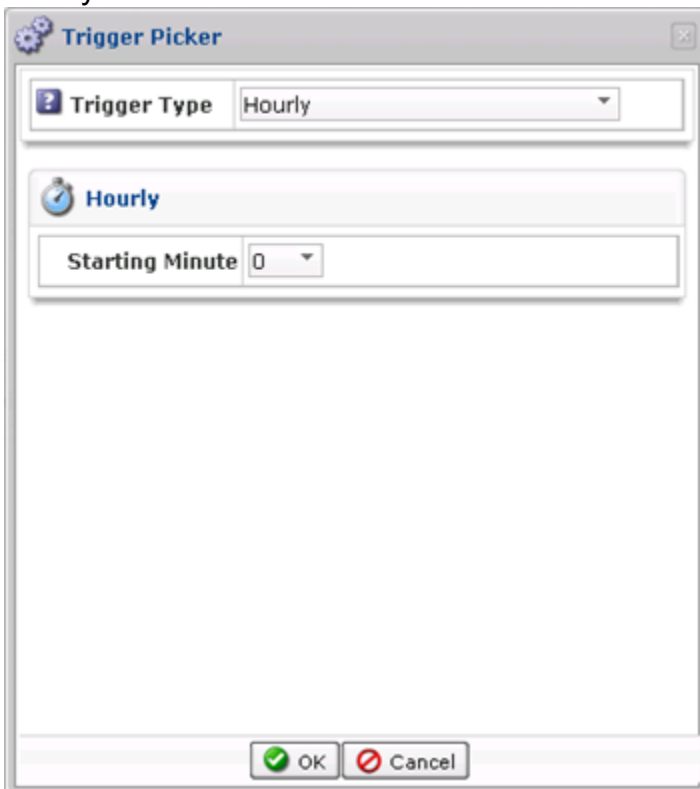

Here you can define the schedule and recurrence for the new Policy. There are seven options available - on demand, minutely, hourly, daily, weekly, monthly, and yearly. You can set the specific time for the replication process depending on the selected trigger.

- On Demand - If you select the On Demand option, the Policy will not start automatically. You can run it manually at any desired time.
- Minutely

You can select a time interval (in minutes). The replication will start according to that interval (e.g. every 10 minutes).

- Hourly

You can select the starting minute. The replication will be launched every hour at that minute.

- Daily

The screenshot shows the 'Trigger Picker' dialog box with the 'Trigger Type' set to 'Daily'. The 'Starting Minute' is set to 8. The 'Hours of Day' section has checkboxes for each hour from 12AM to 11PM. The checkboxes for 9AM, 2PM, and 10PM are checked.
