

Sending Your Control Panel Account Backup to Control Panel Home

After a backup is performed, data is stored in a created [Recovery Point](#). There are three ways for you to restore or access your files:

1. Restore selected files to their original location. See [Restoring Your Control Panel Account](#).
2. Download files to local computer and upload files via FTP to web site (control panel home). See [Downloading Your Control Panel Backup to Local Computer](#).
3. Send a TAR or ZIP containing selected or all files to control panel home directory.

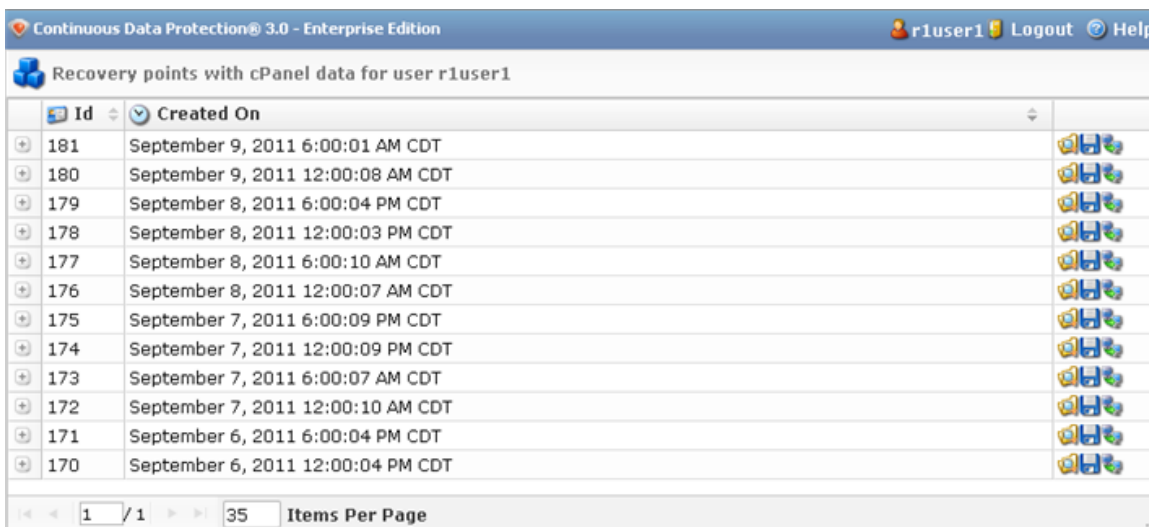

This topic describes the third option. Follow the instructions below to send a TAR or ZIP containing selected or all files to control panel home directory.

 **Tip**
The instructions are for control panel end users.

1. Access the R1Soft CDP web interface. For more information, refer to:

- [Accessing Your Account Backups via Direct Link](#)
- [Accessing Your Account Backups via cPanel Plugin](#)

2. You will see a list of Recovery Points in which your user data is stored.

1 / 1 35 Items Per Page

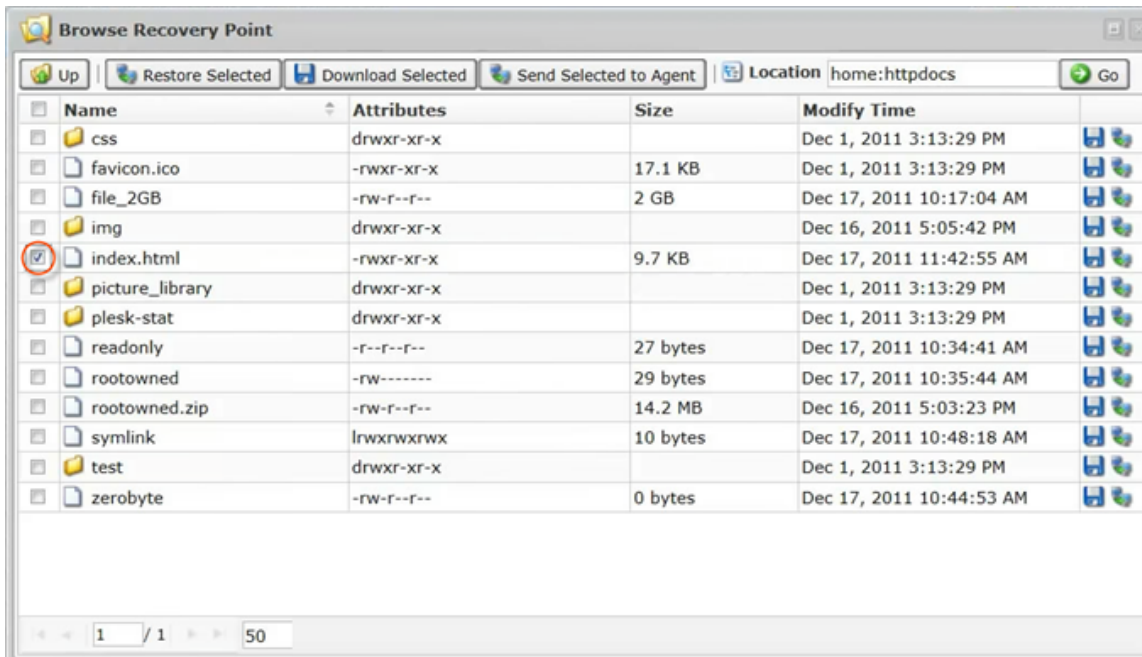

**Note**

You can access only the files you own. You cannot restore files owned by other users or root files.

3. Click the "Browse" icon to choose the files you want to restore.

4. Check the boxes that correspond to the files you want to send to Agent.

5. Click on the "Send Selected to Agent" button.
