Linux Agent CLI - Starting The Agent

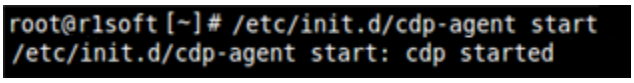
To start the Agent, follow the instructions below.

1. Run #cdp-agent command with the start option:

```
# /etc/init.d/cdp-agent start
```

Return:

```
/etc/init.d/cdp-agent start: cdp started
```



2. Verify the Agent's status using the status option of the same command:

```
# /etc/init.d/cdp-agent status
```

Return:

```
/etc/init.d/cdp-agent status: cdp (pid 3223) running
```

For more information about the #cdp-agent command and its options see cdp-agent.
