Linux Agent CLI - Displaying Agent Version

Follow the instructions below to view the Agent's current version.

Run the #r1soft-setup command with the --version or -v option:

```
# r1soft-setup -v
```

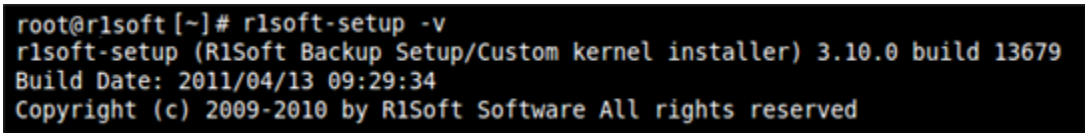
or

```
# r1soft-setup --version
```

Return:

The version, build date, and copyrights will be displayed as follows:

```
r1soft-setup (R1Soft Backup Setup/Custom kernel installer) 3.10.0 build 13679
Build Date: 2011/04/13 09:29:34
Copyright (c) 2009-2010 by R1Soft Software All rights reserved
```



For more information about the #r1soft-setup command and its options see r1soft-setup.
