# Accessing CDP Configuration Utility

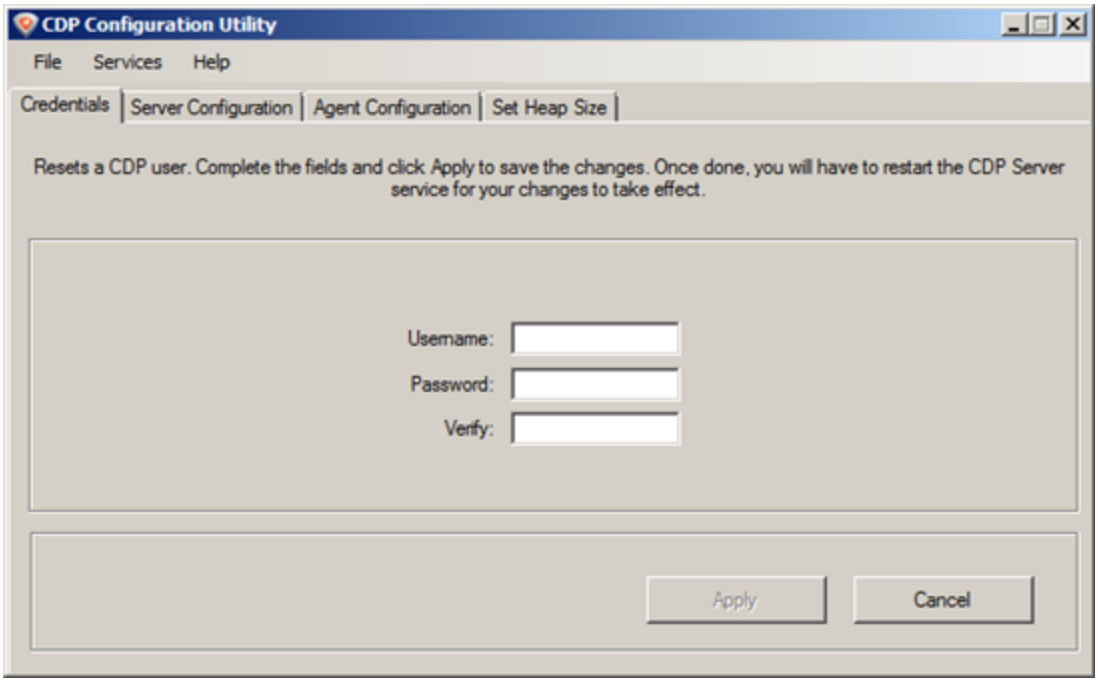

Follow the instructions below to access the Windows CDP Configuration Utility.

> **Note**
> For Enterprise Edition, CDP Configuration Utility is available on the machine with CDP Server installed. On the machine where CDP Agent is installed, use Windows CDP Agent Configuration Utility.

Go to Start › (All) Programs › R1Soft CDP Backup › CDP Configuration Utility.

The Configuration Utility will start.

CDP Configuration Utility
File
Services
Help
Credentials
Server Configuration
Agent Configuration
Set Heap Size
Resets a CDP user. Complete the fields and click Apply to save the changes. Once done, you will have to restart the CDP Server service for your changes to take effect.
