Scroll Bar is Added to the Properties Window

Symptom

If the size of a window is smaller than its contents, a scroll-bar should appear to allow you to scroll to see the non-visible content.

Test Case.

Log in to the CDP Server and go to the "Users" screen. Then click on the "Edit" button for a user. In the user properties window, click on the "Agents" tab.

If you have more Agents than can be displayed in the window, there is no way to scroll down and view/edit the rest of the Agents.

Resolution

The issue has been corrected in CDP 4.0.0.
