

Solved Issue with Task History

Symptom

Task History items are not listed for users with appropriate rights, and `monitor.log` has errors.

A user is not able able to see anything in their Task History, despite having full control.

Cause

This issue is caused by a non-Super User running at least one email reporting task. After it is run, no Task History is displayed.

Resolution

The issue has been corrected in CDP 4.0.1.
