

Control Panel Add-On - Solved Issue with "Download File List"

Symptom

Once a Control Panel user restores files using the "Restore to Agent" function, the "Download File List" option provides an empty text file.

Steps:

1. Log in as the Control Panel user.
2. Browse one of the user's Recovery Points.
3. Select individual files or the home directory and click "Restore Selected."
4. After clicking "Restore," the process will be started.
5. Once the restore has completed, click the "Files Restored" tab.
6. A list of successful and unsuccessful files should display.
7. Click "Download File List."

Resolution

The issue has been corrected in CDP 4.2.0.
